

### Installation Procedure

1. Select a convenient panel location ensuring enough space behind to accommodate the radio / CD player and to allow for the swing of the window when opened.
2. Open the window by pressing the button and temporarily remove the two side wings, these are removed by simply pulling them from above.
3. Cut the hole slot 210mm wide by 86mm high.
4. Assemble the front cover and gasket and insert into the slot. Using the cover as a template, mark the four fixing mounting holes ready for drilling.
5. Temporarily remove the cover and gasket and drill 4 x 4.5mm holes where marked. Reinstall the cover and gasket.
6. Insert the 4 self tapping screws to secure the cover to the panel.
7. Carefully feed wiring for the radio through the open door and place the radio into position. Use the manufacturer's bracket or cage to retain the radio / CD player.
8. Refit the two side wings.
